

COMPACTION RANGE

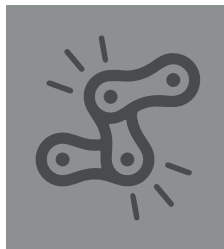

REN 650

Hydraulic rollers

REN 650 hydraulic rollers are ideal for larger compaction jobs.

- Hydraulic transmission system with independent motors for each roller
- Water tank capacity: 45l
- Accessibility to small spaces
- Handle with vibration absorption system
- Lifting point to facilitate loading and unloading
- Front LED lighting system
- Electric starting system

+ Maneuverability

Its small distance between axes facilitates the turning maneuvers of the machine.

+ Sturdiness

It is made up of a shockproof structure to protect the motor and extend its useful life. Thanks to the simplicity of RENs, maintenance is minimal.

+ Safety

Emergency control system that guarantees the safety of the user.

+ Optimized design

No side overhang for optimum compaction up to the edge of walls or curbs.

Technical Data

MODEL	Weight (kg)	Centrifugal force (kN)	Forward speed (m/min)	Backward speed (m/min)	Frequency (Hz)	Power (kW)	Engine
