

**SURFACING RANGE**

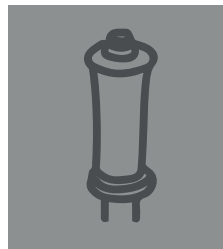

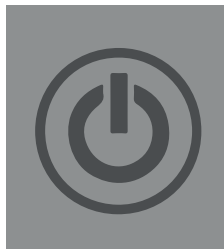

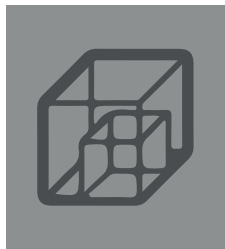

# TIFON 908

## Double trowel

The TIFON 908 double trowel is a full equipped and robust product, being the perfect option for large jobs.

- Water and fuel tanks made of stainless steel
- Greater compactness to improve its transport and volume
- Lighting system with two LED spotlights
- Easy access to oil change without removing the engine
- Dimensions: 2050x1800x1000 mm

**+ Less bulky**

The TIFON 908 engine is located on one side, making it more compact for easier transportation.

**+ Electronic start**

The start of the TIFON 908 is fully electronic, making it easier and faster.

**+ Dead man's system**

The safety system automatically disconnects the machine when the user stops pressing the pedal, preventing any potential injuries.

**+ Ergonomics**

The water ejectors of the irrigation system are activated straight from the handles.

### Technical Data

MODEL	Engine	Power (Hp)	Max speed (r.p.m.)	Working speed (r.p.m.)	Working dimensions (mm)	Number of blades	Water & fuel tank capacity (L)	Weight (kg)
