

SURFACING RANGE

TORNADO E-BATT

Battery-powered light screed

TORNADO E-BATT is the most eco-friendly version with a low noise level, making it suitable for indoor use and cordless.

+ Safe and reliable

The safety voltage of 24V ensures user safety. The lack of cables also eliminates the risk of electric shock.

+ Eco-Friendly

TORNADO E-BATT has a much lower environmental impact thanks to its battery-powered electric motor.

+ Lightness and manageability

Its folding handle makes it easy to carry and doesn't require any additional tools.

+ Zero maintenance

The brushless motor is maintenance free and has no waste-generating parts.

- High strength aluminium profile
- Their profiles are interchangeable with other vibrating screeds
- Anti-corrosion treatment on the profile edges
- The 200mm profile is designed to provide good buoyancy
- It maintains the robustness, manageability and ergonomics that define the entire ENAR TORNADO series
- Due to its battery-powered design, it is highly sustainable and has a low environmental impact
- With its low noise level, it is ideal for environments with noise restrictions, such as city centers

Profiles

Length (m)	Weight (kg)
1.5	4.6
2	6.2
2.5	7.8
3	9.3
4	12.5
